

# VitaTek is here to change EO Sterilization.

VitaTek is aware of the unmet need in the medical device market to provide communication, sterilization, and expedient timelines. We understand the importance of validation runs being completed in \*4 weeks, compared to the industry standard of 6–12 months. We also know that routine runs (small batch) should be able to be completed in 2–3 days, compared to the industry standard of 4 weeks.
